Personal Statement

I am a recent computer science graduate that has dedicated a large portion of time into ensuring I am educated in the fields that I desire to pursue a career within.

I pride myself on being a reliable individual with the drive to better myself and work to the best of my ability for any tasks I am assigned to complete. I have ensured to keep up to date with current development and information technology trends to ensure that I can understand what is required of me within a IT-Centric workplace and to enable me to perform tasks relating to specific requirements of an employer in the field.

I have set a focus on coding, I ensure that I understand the concepts and processes of working within the selected development languages that I have studied. I always focus on bettering my knowledge of the chosen languages so that I am able to assist in creating high-quality developments, and so that I am able to further my knowledge within the development field.

Key Skills

- ❖ HTML,PHP, CSS,JS, MySQL,Cloud DB integration
  - ➢ Level: ●●●●○○
  - ➢ Examples: Web Development Units within BSc Study.(see GitHub)
- ❖ React.JS
  - ➢ Level: ●●●●○○
  - ➢ Examples: Freelance Android applications / Mobile Application Final Year Project (See GitHub)
  :

Used Technologies

- ❖ Git
- ❖ HTML/PHP development frameworks - Bootstrap
- ❖ DBaaS integration - Firebase for user validation through cloud database systems
- ❖ GitHub
- ❖ Atom IDE
- ❖ Basic MySQL

Past Work Experience

Freelance Mobile Application Development
- ❖ Created Android Applications
- ❖ Self-study into the functionality of the Android Studio SDK

Education

Qualification	Awarding Body	Year Awarded
BSc in Computing Science	Staffordshire University	2019
Applied Computing HND	Staffordshire University	2018
Level 3 BTEC Extended Diploma in IT	Tamworth College	2016
IT BTEC	Netherstowe High [OCR ONAT2]	2014
Business Studies	Netherstowe High [BTCe2]	2014
English	Netherstowe High	2014
Maths	Netherstowe High	2014

Hobbies and Interests

In my spare time I enjoy working on small development projects to further my understanding of software development practises.
I enjoy spending my time working on development projects or by doing freelance work to broaden my knowledge of the subjects I am working on at the time.
I am a PC Enthusiast that enjoys working on repairing any potential software or hardware issues as problem solving is something I feel is an important skill in any profession.
